

PRODUCTION CHECKLIST

- Put your phone in the correct **resolution** (1920w x 1080h pixels) and **aspect ratio** (16:9) in your video settings
- Take the time to **frame** each shot. Play with perspective and distance
- Before you film each shot **mark it** so you can organise footage more easily in post-production
- Start by filming **wide shots** and then move the camera closer for **medium shots** and finally **close ups**
- Film everything in **landscape!**
- Don't try and film it all in one day! Take your time and enjoy the process
